PROJECTS

ECE Blog Website

A text editor rich feature full and optimized blog website for my college branch. More than 300 students registered and more than 200 blogs were posted on the website. Currently working on a bigger and better version of Blog Site as a side project with the college team. Check here

Link Shortner

A simple NodeJS/EJS side project. Building a simple link shorter using the system design concepts to handle more than 100 Billion unique short links can be generated. Check here

Booking System

Developed a full-blown booking system for courier service company ATC Couriers based out of Australia. The website is in production and is being used by more than 100 customers on an average daily.
